

Getting to know our families

We are honored to be involved in the lives of our surrounding EMS agencies and hospitals. Often, we are at your hospitals and scenes during emotional and stressful events. We build special bonds during these times, and learn to depend on each other. You all become very special to us, and we enjoy getting to know you better. Flying safely and safely caring for our patients is also driven by what we all have waiting at home for us. We are excited to show and tell.
